CA Pak: industrial vacuum cleaners for removing waste scraps

CA Pak industrial vacuum cleaners are designed with a specific aim, which is to maximize the recovery volume, for the collection of large quantities of materials. They are top loading vacuum cleaners with base suction to ensure the total filling of the tank.
CA Pak vacuum cleaners compact suction materials in the tank and are therefore ideal for the removal and compaction of bulky materials such as production waste.

CA Pak is an essential equipment for different applications such as in packaging, textiles and floor treatment industries. It is therefore particularly suitable for the industrial, public, automotive, logistics, transport and artisan sectors as well as for cleaning companies.

KEY FACTORS FOR CA PAK:

- Vacuum cleaners designed to maximize the recovery volume.
- Top loading ensures the total filling of the tank.
- Suction materials are compacted in the tank.
- Ideal to compact bulky materials.
- Robust structure entirely made of steel to withstand the most difficult working environments.

MODELS

CA Pak 3L
Tank capacity: 100 l
Type: industrial
Suction: motors

Details that matter

TWO VACUUM INLETS
The machine can be used by one or two operators simultaneously.

FILTERS
Two large size filters: main polyester filter with 35500 cm2 of filtration surface area.
Liner filter bag in non-woven material for the collection and disposal of recovered material.
It can be disposable or reused.

TRANSPARENT LID
The transparent lid allows to check the filling level of the tank.

POWERFUL MOTORS
Three powerful tangential motors provide an unbeatable airflow rate.

The tangential motors positioned at the base of the machine to maximize the tank capacity and compact the incoming materials.

TECHNICAL DESCRIPTION		CA Pak 3 L
Voltage-frequency	V-fase-Hz	230-1-50/60*
Power	W-Hp	3300
Motor	n./typo	3/double stage tangential bypass
Water lift	mmH_2O / $inchH_2O$	2500/98,42
Airflow	l/s / gal/s	500/132
Tank capacity	l/gal	100/26,41
Type of collection	-	Collection bag (disposable or reusable)
Filtration surface area	cm^2/$inch^2$	35500/13976,37
Noise level	dB	74
Dimensions (Lxhxw)	mm/inch	550x1150x660/21,65x45,27x25,98
Weight	Kg/lbs	50/110,23

**other voltages available on request*
